

## INTRODUCTION

Since 1927, Long Beach City College has been at the heart of the community providing educational programs to the Los Angeles community. The college sought out pre-qualified and experienced security integrators to implement a 600 camera District-Wide Surveillance System. With Monarch's industry certifications and in-depth experience of CCTV Surveillance Systems, they were awarded the public project.

## Background

In efforts to make the District campuses a safe and secure environment, Long Beach City College awarded a \$ 3,000,000 million-dollar public works Security Surveillance project to local contractors. Monarch was contracted as a Security integrator due to similar past project experience.

## SOLUTION

- Implementation of 600 Arecont Cameras Programming of Genetec Video Management Software Security Center
- Integration with Long Beach Police Department's surveillance system
- Installation and certification of infrastructure solutions such as direct burial backbone, horizontal cabling, high-voltage power supplies, coring, and data equipment
- Design and configuration of Pelco power supplies, Veracity POE Extenders, Omnitron fiber converters, and Raytek Illuminators to power cameras within buildings and remote pole locations

## BENEFITS

- To date, the highest performing video surveillance camera system in California community colleges
- Collaboration with the Long Beach Police Department will facilitate with the quick responsiveness needed to keep students, faculty, and staff safe
